

# COMPUTER CLUB CLASSICAL MOMMENTS

I needed help with internet safety and what to do if anything came up from anyone I didn't know. I got it by going to computer club on a Wednesday after school until 4.30pm. It was good fun it wasn't like something where you got told off. In these 10 weeks of fun we did lots of different activities like stick and cut sheets, posters, and other personal details if anything came up we would

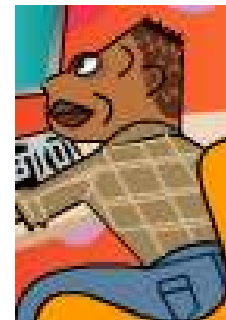

have had to delete it. You missed the fun club is what the people called it who went. In the grid club site we learned all the different things that were dangers and played some

really good games like make our own websites and chocolate wrappers (mmmm).some of the characters are called Chloe, Griff, Jason, Sunil and

Chantelle. Sunil character is for emails and what to do if anything like attachments came up. Chloe is for mobile safety she is the most important they are all really important. This is Chloe she teaches the mobile.

This is a photo of Sunil he teaches the emails and if an attachments came up on your computer.
