

Computer Times

Are YOU aware of what's on the Internet?

Do you need help with Internet Safety – well I did?
So I came to computer room 3 it was great fun!

I started in November and I had a really good time. I learnt that when you are on MSN not to give out any personal details, not to open e-mails you don't know who from and if anyone texts you asking for pictures or your address I learnt to save my work and show it to my mum my teacher. You have your own choices- there was no right or wrong answers just what you thought about everything. I joint the cyber café, that's an online safety programme. I met lots of characters here are some of them.

This character is called Chloe. She taught me not to open texts I do not have in my contacts.

This character is called Sunil. He taught me how to open e-mails without getting a virus.

This Character is called Chantelle. She taught me how to keep safe while using chat rooms.

This character taught me about instant messaging and what it is.
